LIFT**

The Ascendor platform stair lift proves itself in both public and private use. Particularly robust materials and user-friendly technologies make it an all-purpose solution for wheelchair users and people with other walking disabilities. You may also use it with a rollator, as a comfortable seat lift (thanks to the fold-out seat) or for the transport of heavy objects.

Fig. 1

Platform lifts for straight and curved staircases

Intermediate landings can be overcome with a curved travel rail (Fig. 1) or by installing rails with elevation changes (Fig. 2). The travel rails can be mounted directly onto the walls or attached to steel stanchions (Fig. 2 & 3). Multi-level landings with parking places can be planned to suit individual requirements.

PRODUCT HIGHLIGHTS

With **various adjustable LED colors** and **individual designs on the platform**, the lift integrates harmoniously into its surroundings. It becomes an attractive eye-catcher instead of a grey necessity. That's beautiful mobility from ASCENDOR.

In the event of a malfunction, a **colour display** provides information about the cause and possible remedies. In this way, 80% of all maintenance cases can be avoided. The display also provides information about the current operating status at a glance.

An **automatic speech output** ensures more comprehensibility.

TECHNICAL DATA

BASIC-EQUIPMENT

- ↑ fully automated control of safety arms and platform
- ↑ handrail and drive rack made out of stainless steel
- ↑ sensor keys on touchpad
- ↑ smooth start/stop and velocity reduction in the curve
- ↑ emergency call button and emergency stop function
- ↑ safety contacts on all sides
- ↑ 24V battery drive with charger
- ↑ anti-slip nabs on platform
- ↑ battery protection function – automatic shutdown when not charged

FLEXIBILITY

- ↑ installation over several floors with stops possible
- ↑ subsequent extension of the rail possible

All values given relate to a bending radius of R = 150mm and a 47° steep curve and 60x60mm special stanchions.

all dimensions in [mm]

A = minimum width for wall mounting
B = platform turning clearance for wall mounting
C = minimum width for stanchion mounting
D = platform turning clearance for stanchion mounting
E = minimum swivel range 180°

The minimum stair width (A/B) allows a 10mm clearance.
